# Franklin County Indicator Profile: Archival Data

## Franklin County Indicator Profile: Archival Data

## Franklin County Indicator Profile: Archival Data

## Alcohol Retail Licenses

**Note:** The State and County rate are the annual number of alcohol retail licenses active during the year, per 1,000 persons (all ages). Retail licenses include restaurants, grocery stores, and wine shops but do not include state liquor stores and agencies. Retail alcohol facilities on military bases and reservations are not licensed by the State and therefore are not included in these data. Policies on licensing distributors, taxing the proceeds, and determining who can sell alcohol varies substantially from state to state. Consequently, there is no consistent comparable source for national data.

**State Source:** Washington State Liquor Control Board, Annual Operations Report

## Tobacco Retail And Vending Machine Licenses

**Note:** The State and County rate are the annual number of tobacco retailer and vending machine licenses active during the year, per 1,000 persons (all ages). Tobacco retailers on military bases and reservations are not licensed by the State and therefore are not included in these data. Tobacco sales licenses include tobacco retailer licenses (stores that sell tobacco products) and tobacco vending machines. November counts are selected as representative of the average yearly number of retailers. No source of comparable national data was obtained.

**State Source:** Department of Health (from the Department of Licensing), Tobacco Prevention Program, Tobacco Statistics

## Temporary Assistance to Needy Families (TANF), Child Recipients

**Note:** The State and County rates are the annual number of children (age birth-17) participating in Aid to Families (AFDC/TANF) programs in the month of April, per 1,000 children (age birth-17). April was selected as the month with an average number of recipients. Nationally, prior to 1997 AFDC Flash Report was used which counts children 0-17. However National TANF child recipients are defined as children 0-19 with almost no children of age 19, therefore national denominators after 1996 are for children 0-18.

**Note:** The State and County rates are the annual number of students in public schools (K-12) whose applications have been approved for free and reduced price lunch programs, per 100 students enrolled in public schools (K-12). Children are eligible for free lunches if their family income is at or below 130% of the federal poverty level or for reduced price lunches if their family income is at or below 185% of the federal poverty level. The National rate is all students (K-12) served in free or reduced price lunch programs.

**Note:** The rate is the annual number of persons registered to vote in the November elections but not voting, per 100 adults (age 18 and over) registered to vote. As part of the November Current Population Survey (the Voting and Registration Supplement), the Bureau of the Census collects data on voting and registration in years with presidential or congressional elections (i.e. every other year).

**State Source:** Office of the Secretary of State, Elections Division, Registered Voters

**National Source:** Calculated using data from U.S. Census Bureau, Statistical Abstract of the United States; "Voting-Age Population, Percent Reporting Registered, and Voted: 1980 to 2000"

**Prisoners in State Correctional Systems (Age 18+)**

**Note:** The rate is the annual number of adult (age 18 and over) admissions to prison, per 100,000 persons (all ages). Admissions include new admissions, re-admissions, community custody inmate violations, and parole violations. Counts of admissions are duplicated so that individuals admitted to prison more than once in a year are counted each time they are admitted. The admissions are attributed to the county where the conviction occurred. No rate is given when the numerator is less than 5. National data after 1998 are not available in an equivalent form.

**Divorce**

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001
National	6.38	6.35	6.43	6.22	6.18	6.01	5.86	5.87	5.67	5.47	5.63	5.36
State		7.60	7.47	7.27	7.22	6.79	6.69	6.65	6.60	6.40	6.05	5.86
Counties Like Us		6.71	6.82	6.87	6.77	6.10	6.14	5.87	5.95	5.35	5.43	5.38
Franklin County		7.13	7.03	6.89	6.93	5.98	5.56	5.45	5.03	4.73	5.19	5.85
Divorces		193	193	198	208	184	171	175	167	160	181	204
Persons, 15+		27,081	27,449	28,739	30,025	30,768	30,765	32,095	33,189	33,811	34,892	34,892

**Note:** The State and County rates are the annual number of divorces per 1,000 persons (age 15 and over). Divorce includes dissolutions, annulments, and unknown decree types; it does not include legal separations. Divorce data is reported by the woman's residence, if in Washington at the time of decree. If the woman lived outside Washington, the man's residence was used. If both parties residence was unknown the event is not assigned to a county, but is included in the state rate. The National rate is based on age 18 and over population.

**State Source:** Department of Health, Center for Health Statistics, Dissolution and Annulment Data

**National Source:** Calculated using Department of Health and Human Services, Centers for Disease Control and Prevention, National Center for Health Statistics, National Vital Statistics System, National Vital Statistics Reports Births, Marriages, Divorces, and Deaths, Provisional Data for August 2001

## Arrests, Domestic Violence

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001

## Net Migration, 3 Year Moving Average

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001
National	Comparable National Data Not Available											
State	18.07	17.53	16.22	13.52	12.33	10.06	9.89	8.73	7.64	4.95		
Counties Like Us	8.74	12.24	17.44	18.37	21.14	15.13	12.03	5.59	2.88	0.51		
Franklin County	0.48	0.41	12.91	17.47	20.49	3.15	9.22	13.11	5.65	1.29		
New Residents	-18	16	506	718	879	138	-403	-598	-266	-62		
All Persons	37,473	38,596	39,201	41,103	42,902	43,843	43,700	45,624	47,042	47,960		

**Note:** Net migration is the annual number of new residents that moved into an area minus the number of residents that moved out of an area. Net migration does not include numbers of births and deaths within an area. Calculating a 3-year moving average smooths net migration. Annual net migration estimates are summed for 3-year ranges then averaged to calculate the numerator. The median year of the 3 years used in the average is used for the population denominator and the year label for the average net migration value.

**Note:** The rates are the annual number of adults (age 18 and over) receiving state-funded alcohol or drug services, per 1,000 adults. Counts of adults are unduplicated so that those receiving services more than once during the year are only counted once for that year. State-funded services include treatment, assessment, and detox. Persons in Department of Corrections treatment programs are not included.

In Foster Care	84	88	90	90	89	91	94	94	64	69	78	
Persons, birth-17	13,017	13,465	13,723	14,437	15,057	15,364	15,298	15,959	16,345	16,671	17,060	

**Note:** The foster care data in this report come from a combination of two sources: 1) Case And Management Information System (CAMIS) data, as reported by the Executive Management Information System (EMIS) and; 2) Social Service Payment System (SSPS). EMIS reports monthly state counts of those receiving selected DSHS services. The number of children receiving Basic Foster Care, as recorded in CAMIS, were used for this report. They include placements with foster families and some placements with relatives. No group care placements are included. In EMIS, those receiving more than one foster care service in a month are counted more than once. For foster care, client counts by zipcode of the care provider come from the Social Service Payment Systems (SSPS). This report uses SSPS zip code counts to apportion the EMIS average monthly counts to zipcodes and counties. The result is a duplicated average monthly count by county. Since the average length of stay is greater than one month, this also represents the average daily count for the year.

**State Source:** DSHS Case And Management Information System (CAMIS) data through Executive Management Information System and Social Service Payment System (SSPS)

**National Source:** US Department of Health and Human Services Administration for Children and Families, Voluntary Cooperative Information System (VCIS), and estimates from Adoption, Foster Care Analysis Reporting System (AFCARS)

## Victims Of Child Abuse And Neglect In Accepted Referrals

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001
National	40.18	41.40	44.17	43.75	43.21	43.05	43.91	42.34	42.55

**Note:** The State and County rates are the annual number of eighth graders whose Battery test score was below the threshold score for the low quartile of the national norm group, per 100 eighth graders who took the Battery test. The Battery test score is the average of the scores on the reading, language, and math portions of the Comprehensive Tests of Basic Skills. Eighth grade is no longer tested in this series. The Iowa Tests of Basic Skills (ITBS) at third and sixth grades, and the Iowa Tests of Educational Development (ITED) at ninth grade, comprise the norm-referenced component of the statewide testing program.

**State Source:** Office of Superintendent of Public Instruction, Instructional Programs, Curriculum and Assessment, Grade 8 Low Quartile Test File

**National Source:** By definition the national low quartile is 25%. The exact score representing that quartile boundary is used by OSPI to calculate the number of students testing below that score in Washington State.

**Poor Academic Performance, Grade 10 Washington Assessment of Student Learning (WASL)**

**Note:** The State and County rates are the annual number of tenth graders who failed one or more content areas in the Washington Assessment of Student Learning (WASL). Tests are given in the spring of the year. Data for 2002 is for students in the 10th grade during the school year 2001/2002.

**State Source:** Office of Superintendent of Public Instruction, Instructional Programs, Curriculum and Assessment, Grade 10 Failing In One Or More Content Areas

**Arrests (Age 10-14), Alcohol- or Drug-Related**

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001
National	1.59	1.48	1.46	1.71	2.26	2.52	3.01	2.94	2.04	2.66	2.60	
State	2.32	1.93	1.95	2.24	3.49	3.59	4.19	4.18	3.46	3.62	3.63	
Counties Like Us	3.67	3.15	4.80	4.29	5.43	6.39	8.02	7.68	7.17	6.48	7.10	
Franklin County	NR	NR	NR	4.78	3.37	4.98	7.37	6.17	2.83	4.89	5.38	
Arrests, 10-14	1	3	4	19	14	21	31	26	12	21	24	
Adjst'd Pop 10-14	3,507	3,702	3,764	3,976	4,154	4,217	4,204	4,215	4,239	4,297	4,463	

**Note:** The rates are the annual number of arrests of younger adolescents (age 10-14) for alcohol and drug law violations, per 1,000 children (age 10-14). Alcohol violations include all crimes involving driving under the influence, liquor law violations, and drunkenness. For children, arrests for liquor law violations are usually arrests for minor in possession. Drug law violations include all crimes involving sale, manufacturing, and possession of drugs.

1) Data may differ from our last report because of refinements to our population adjustment process. Denominators are adjusted by subtracting the population of police agencies that did not report arrests to Uniform Crime Report (UCR). In spite of this population adjustment, when the non-reporting police jurisdiction is where much of the crime occurs, the rate for the county will be lower than it would be if that jurisdiction was included. For percent subtracted and the agencies not reporting, see the appendix on Non-Reporting Agencies and Population.

2) The DUI portion of this measure is likely understated, because arrests made by the State Patrol (approximately 40% of DUI arrests) are not attributable to counties. State Patrol arrests are included in the state rates.

3) No rate is given when the numerator is less than 5.

National	3.28	3.27	3.35	3.34	3.39	3.47	3.18	3.07	2.92	2.77	2.59	
State	1.71	1.82	1.82	1.70	1.90	2.21	1.76	1.86	1.78	1.67	1.75	
Counties Like Us	3.01	2.51	3.24	3.36	3.09	3.64	2.83	3.35	2.84	2.63	2.48	
Franklin County	3.43	3.26	4.59	4.76	3.56	3.76	3.38	2.87	2.31	2.56	2.52	
Arrests, 18+	84	82	117	127	99	107	96	85	71	80	81	
Adjst'd Pop 18+	24,456	25,131	25,478	26,666	27,845	28,479	28,402	29,665	30,697	31,289	32,086	

**Note:** The rates are the annual number of arrests of adults (age 18+) for violent crime per 1,000 adults (age 18+). Violent crimes include all crimes involving criminal homicide, forcible rape, robbery, and aggravated assault. Simple assault is not defined as a violent crime. Data may differ from our last report because of refinements to our population adjustment process.

Denominators are adjusted by subtracting the population of police agencies that did not report arrests to UCR. In spite of this population adjustment, when the non-reporting police jurisdiction is where much of the crime occurs, the rate for the county will be lower than it would be if that jurisdiction was included. For percent subtracted and the agencies not reporting, see the appendix on Non-Reporting Agencies and Population. No rate is given when the numerator is less than 5.

**Arrests (Age 10-17), Alcohol Violation**

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001
National	7.41	6.41	5.24	4.88	5.12	5.12	6.58	6.53	6.73	6.66	6.14	
State	11.11	8.62	7.20	7.54	8.06	7.83	9.65	9.39	9.28	9.56	9.02	
Counties Like Us	19.15	11.64	15.04	14.80	12.86	13.27	14.72	14.52	23.55	20.40	18.70	
Franklin County	3.48	4.60	2.62	7.11	6.32	3.54	7.61	7.67	4.75	6.31	5.92	
Arrests, 10-17	19	26	15	43	40	23	50	51	32	43	43	
Adjst'd Pop 10-17	5,456	5,652	5,735	6,049	6,334	6,506	6,567	6,645	6,731	6,819	7,269	

**Note:** The rates are the annual number of arrests of adolescents (age 10-17) for alcohol violations, per 1,000 children (age 10-17). Alcohol violations include all crimes involving driving under the influence, liquor law violations, and drunkenness. For children, arrests for liquor law violations are usually arrests for minor in possession. 1) Data may differ from our last report because of refinements to our population adjustment process. Denominators are adjusted by subtracting the population of police agencies that did not report arrests to UCR. In spite of this population adjustment, when the non-reporting police jurisdiction is where much of the crime occurs, the rate for the county will be lower than it would be if that jurisdiction was included. For percent subtracted and the agencies not reporting, see the appendix on Non-Reporting Agencies and Population. 2) The DUI portion of this measure is likely understated, because arrests made by the State Patrol (approximately 40% of DUI arrests) are not attributable to counties. State Patrol arrests are included in the state rates. 3) No rate is given when the numerator is less than 5.

**Note:** The State and County rates are the annual number of adolescents (age 10-17) who committed suicide or were admitted to the hospital for suicide attempts, per 100,000 adolescents (age 10-17). Suicides are based on death certificate information. Suicide attempts are based on hospital admissions, but do not include admissions to federal hospitals. Rates are not calculated for numerators less than 5.

**State Source:** Department of Health, Office of Hospital and Patient Data Systems, Comprehensive Hospital Abstract Reporting System (CHARS) and Department of Health, Center for Health Statistics Death Certificate Data

**Topics:****Counting Alcohol- or Drug-related Deaths****Counties Like Us****Duplicated and Unduplicated Counts****Rates – Why is Raw Data Converted to Rates?****Uniform Crime Report - Non-Reporting Police Jurisdictions****Counting Alcohol- or Drug-related Deaths**

Alcohol- or drug-related deaths are identified by matching the underlying cause of death from death certificate records to a list of causes that are considered AOD-related. The deaths identified as AOD-related then may be summed to provide county and state totals. Dividing the total AOD-related deaths by all deaths in a county or state gives the percent of all deaths that are alcohol and drug related. Lists of underlying causes of death that are AOD-related have been developed in several studies (see first three in list below). AOD-related deaths used in this report are determined using a comprehensive assembly of disease, accident, and injury codes identified in those studies. The codes are based upon the International Classification of Diseases, Ninth Revision (ICD-9) from 1990 to 1998 or International Classification of Diseases, Tenth Revision (ICD-10) after 1998 .

The identified AOD-related causes of death may be either fully attributable or sometimes attributable to alcohol or drugs. Some underlying causes of death are explicit in their mention of alcohol or drugs. Examples include alcoholic cirrhosis of the liver (ICD-9 code 571.2), alcohol and drug dependence syndromes (ICD-9 codes 303 and 304, respectively), and drug poisonings (ICD-9 codes E850 through E859). All deaths of this sort are fully, or 100%, attributable to alcohol or drug abuse and are considered direct AOD-related deaths.

Other underlying causes of death are related only sometimes to alcohol or drugs. For example, epidemiological studies have shown that, among persons over 35 years of age, 60% of deaths due to chronic pancreatitis (ICD-9 code 577.1) and 75% of malignant neoplasms of the esophagus (ICD-9 code 150) are alcohol-related. For persons of all ages, 42% of motor vehicle traffic and nontraffic deaths (ICD-9 codes E810 through E825) are alcohol-related. The appropriate percentage of such indirectly attributable deaths are also counted toward totals for AOD-related deaths.

The table on the following page characterizes the different diseases, injuries, and accidents by: name, ICD-9 or ICD-10 code, percent attributable to alcohol or drugs, age of inclusion. Information sources are listed below.

Disease Category	ICD-10 Code	ICD-9 Code	Age	Percent AOD
<b>Diseases directly attributable to alcohol</b>				
Alcoholic psychoses	F10, F10.3-F10.9	291	>=15	100%
Alcohol dependence syndrome	F10.2	303	>=15	100%
Alcoholic polyneuropathy	G62.1	357.5	>=15	100%
Alcoholic cardiomyopathy	I42.6	425.5	>=15	100%
Alcoholic gastritis	K29.2	535.3	>=15	100%
Alcoholic fatty liver	K70.0	571.0	>=15	100%
Acute alcoholic hepatitis	K70.1, K70.4	571.1	>=15	100%
Alcoholic cirrhosis of the liver	K70.3	571.2	>=15	100%
Alcoholic liver damage, unspecified	K70.2, K70.9, K70	571.3	>=15	100%
Excessive blood level of alcohol	R78.0, T51	790.3	>=15	100%
Alcohol accidental poisoning or toxic effect	X45, Y15, T51.0-.1, T51.8-.9	E860.1, E860.2, E860.8, E860.9	>=15	100%
Nondependent abuse of drugs - Alcohol	F10.1	305.0	>=15	100%
Alcoholic myopathy	G72.1	New icd10	>=0	100%
Maternal care for (suspected) damage to fetus from alcohol	O35.4	New icd10	>=0	100%
Newborn affected by maternal use of alcohol	P04.3	New icd10	>=0	100%
Fetal alcohol syndrome (dysmorphic)	Q86.0	New icd10	>=0	100%
<b>Diseases indirectly attributable to alcohol</b>				
Neoplasms				
Breast	C50, D05	174.0-174.9, 233.0	>=35	13% F
Esophagus	C15, D00.1	150.1-150.9, 230.1	>=35	75%
Larynx	C32, D02.0	161.0-161.9, 231.0	>=35	50% M, 40% F
Lip, oral cavity, pharynx	C00-C14, D00.0	140.1-141.9, 143.0-149.9, 230.0	>=35	50% M, 40% F
Liver	C22, D01.5	155.0-155.2, 230.8	>=35	29%
Cardiovascular				
Cardiomyopathy	I42.0 - I42.2, I42.5, I42.7- I42.9	425.1, 425.4, 425.9	>=35	40% M
Hypertension	I10-113, O10-O14, O16	401.0-404.9, 642.0, 642.2, 642.9	>=35	11%
Digestive System				
Cirrhosis	K71.7, K74.5-K74.6	571.5	>=35	74%
Duodenal Ulcers	K26	532.0-532.9	>=35	10%
Pancreatitis, acute	K85	577.0	>=35	47%
Pancreatitis, chronic	K86.1- K86.3, K86.9	577.1, 577.2, 577.9	>=35	72%
Other (Schultz, Rice, & Parker 1990)				
Epilepsy	G40.3, G40.4, G40.6, G40.9	345.1, 345.3, 345.9	>=15	30%
Seizures	R56	780.3	>=15	41%
Tuberculosis	A16-A19	011-013, 017, 018	>=15	25%
Motor vehicle accidents	V02-V04, V09.0, V09.2, V12-V14, V19.0-V19.2, V19.4-V19.6, V20-V79, V80.3-V80.5, V81.0-V81.1, V82.0-V82.1, V83-V86, V87.0-V87.8, V88.0-V88.8, V89.0, V89.2	E810-E825	>=0	42%

Disease Category	ICD-10 Code	ICD-9 Code	Age	Percent AOD
Diseases indirectly attributable to alcohol (continued)				
Pedal cycle and other vehicle accidents	V01, V05–V06, V09.1, V09.3–V09.9, V10–V11, V15–V18, V19.3, V19.8–V19.9, V80.0–V80.2, V80.6–V80.9, V82.2–V82.9, V87.9, V88.9, V89.1, V89.3, V89.9	E826-E829	>=0	20%
Water transport accidents	V90-V94	E830-E838	>=0	20%
Air & space transport accidents	V95-V97	E840-E845	>=0	16%
Accidental falls	W00-W19	E880-E888	>=15	35%
Accidents caused by fire and flames	X00-X09	E890-E899	>=0	45%
Accidental drowning and submersion	W65-W74	E910	>=0	38%
Suicide and self-inflicted injury	X60-X84, Y87.0	E950-E959	>=15	28%
Homicide & other purposely inflicted injury	X85–Y09, Y87.1	E960-E969	>=15	46%
Other	X31, W79, W50-W52, W20-W34, Y10-Y19	E901, E911, E917-E920, E922, E980	>=15	25%
Diseases directly attributable to drugs				
Drug psychoses	F11-F16, F18-F19	292	>=15	100%
Drug dependence syndrome	F11-F16, F18-F19	304	>=15	100%
Polyneuropathy due to drugs	G62.0	357.6	>=15	100%
Drug dependence during pregnancy	F11-F16, F18-F19	648.3	>=15	100%
Suspected damage to fetus from drugs	O35.5,	655.5	>=15	100%
Noxious influences affecting fetus	P04.4	760.7	>=15	100%
Drug reactions, intox., withdrawal specific to newborn	P96.1	779.4, 779.5	>=15	100%
Selected drug poisonings	R78,R78.1-R78.6	962, 965, 967-971, 977 (CHARS 969.6)	>=15	100%
Selected accidental drug poisonings	X40-X44	E850-854, E858.0, E858.8, E858.9	>=15	100%
Nondependent abuse of drugs - drugs	F11-F16, F18-F19	305.2-305.9	>=15	100%
Diseases indirectly attributable to drugs				
AIDS (from IV drug use exposure)	B20-B24	042.0-044.9	>=15	5%
Cardiovascular				75%
Endocarditis	I33.0, I33.9	421.0, 421.9	>=15	75%
Other				
Hepatitis A	B15.9	70.1	>=15	12%
Hepatitis B	B16-B16.9	70.2, 70.3	>=15	36%
Hepatitis C	B17-B19.9	70.5, 70.9	>=15	10%

## Counties Like Us

Knowing that your county has a particular rate for one of the indicators---say, number of tobacco sales licenses---does not help you evaluate the importance of that indicator to your risk profile. You do not know if it is higher or lower than you could reasonably expect. It is more useful to compare your county rate to the state rate, which is the average for the whole state, and to other counties, especially counties that have some characteristics in common with your county. This is especially important when urban rates differ substantially from rural rates. The comparison we present is for a group of counties that are similar in characteristics related to prevention planning: population of young people (aged 10-24), the percentage of deaths in the county that are alcohol and drug-related, and a simple geographic division into Eastern and Western Washington. For each indicator the Counties Like Us rate is the average rate across all of the counties in the cluster.

The groupings for “Counties Like Us” are as follows:

Urban A\* – King County

Urban B\* – Pierce, Snohomish, and Spokane

Urban C – Benton, Clark, Kitsap, Thurston, Whatcom, and Yakima

Rural A – Ferry, Franklin, Grant, Klickitat, Okanogan, Pend Oreille, and Skamania

Rural B – Adams, Asotin, Chelan, Columbia, Douglas, Garfield, Kittitas, Lincoln, Stevens, Walla, and Whitman

Rural C – Clallam, Cowlitz, Grays Harbor, Island, Jefferson, Lewis, Mason, Pacific, San Juan, Skagit, Wahkiakum

\* For comparison, King County is compared to Urban B, but average scores for the indicators in Urban B do not include King County.

## Duplicated and Unduplicated Counts

In an unduplicated person count, each person is counted only once in a year for the specified activity or service type, even if they receive that service multiple times during the year. Examples include Temporary Assistance to Needy Families (TANF) Child Recipients, Food Stamp Recipients, and alcohol or drug treatment. Duplicated counts are made of events such as prison admissions, arrests, births, or admission to a hospital for attempted suicide. For instance, each time a person is admitted to a prison, that “event” is counted. Therefore, a person admitted more than once is included more than once in the total count.

### Rates: why is “raw data” converted to rates?

In order to make comparisons between counties and the state, and between counties that have different sizes, we use rates to describe an event in terms of a standard size population---either per 100 (percent), per 1,000 or per 100,000. For instance, what does it mean if County A has 42 alcohol retail licenses, and County B has 399? Does it mean that based on this indicator, the risk factor (Availability) is much higher in County B than it is County A? No, not if County B is a much bigger county. If County B is bigger, then the “rate” of liquor licenses per population might be the same or even lower. The only way to compare them is to convert the raw numbers to rates, based on the same population factor.

For instance:

County A: # of licenses – 42, # of persons (all ages) – 14,297

County B: # of licenses – 399, # of persons (all ages) – 186,185

To calculate the rate per 1,000:

$42 / 14,297 = .002937$   $.002937 \times 1,000 = 2.94$

$399 / 186,185 = .002143$   $.002143 \times 1,000 = 2.14$

So the rate of alcohol retail licenses is 2.94 per 1,000 people in County A, and 2.14 per 1,000 people in County B.

**Uniform Crime Report - Non-Reporting Police Jurisdictions**

Most law enforcement agencies report arrest data to the Washington Association of Sheriffs and Police Chiefs (WASPC), which in turn provides data to the FBI's Uniform Crime Reporting Program. This is the source of our arrest data. Some jurisdictions do not report all arrests, some report partial years, and some withhold certain categories of arrests.

The information in the following two sections, Non-reporting Population and Non-reporting Agency, show how and when your counties police jurisdictions reported data to the Washington Association of Sheriff's and Police Chiefs. If your county is one with a significant amount of incomplete arrest data, be very careful that you adjust your risk assessment to reflect this. In other words, the reported arrest rates may not adequately reflect the entire county. This will be true especially in those cases where the non-reporting police jurisdictions have either very high or very low arrest rates, compared to the rest of the county.

In order to compensate for missing police reports, we have adjusted the denominator in the rate calculation so that it reflects only the proportion of the county for which we do have data. For instance, say County A, with a population of 40,000, has eight police districts. Now, if one of the police districts in the county did not report their arrests, the number of arrests would not be representative of the whole county. Therefore, we would not want to use the population of the whole county in the denominator because that would make the rate lower than it should be. The solution used in this report is to subtract the population of that missing police district from the county population. We follow the same procedure for police districts that report partial years: if they report only six months, we use only half of the population to calculate the rate.

Due to the uneven geographic distribution of crime, missing police data can cause spikes or dips in the trend data comparison of multiple consecutive years. We do not run into this problem in the state report because there (as opposed to the individual county reports) we are only reporting 5-year averages. Most adjustments for non-reporting population are then smoothed out at the county level.

**Franklin County****Populations subtracted for police agencies not reporting arrests to UCR**

Arrest data in this report comes from the Uniform Crime Report. Police agencies are not required to report arrests to UCR, they do so voluntarily. For a variety of reasons, a jurisdiction may report part or none of the arrests for a year. In these cases, the denominator is the population of the areas that did report. For example, if juvenile arrests for one agency are not reported, the juveniles for that jurisdiction are not included in the denominator either.

The tables below show the values that comprise the adjustment for your county for each age range we report. "% Subtracted" is the percent of the county's population subtracted for non-reporting. "Subtracted" is the amount subtracted. "Persons" is the county population. "Adjst'd Pop" is the denominator used to calculate indicator rates.

Nevertheless, rates can differ markedly from year to year particularly if a jurisdiction, where most of the crime in the county occurs, did not report.

All Arrests for 10-14 year olds have 5 year rates which represent **100.00** % of the county population  
Adjustments for non-reporting (age 10-14)

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000

### Police Agencies that did not report arrests to UCR

Agencies that did not report arrests, or reported juvenile or adult arrests for only a part of the year, are indicated. If a jurisdiction extends into more than one county, arrests are apportioned to each county.

*X Did not report arrests to UCR.*

[illegible]
